Longwood ID number

A 10x10 grid of circles, each containing a digit from 0 to 9. The digits are arranged in rows: the first row contains eight 0s, and the subsequent nine rows contain digits 1 through 9 respectively, with each digit repeated eight times per row. Above the grid is a horizontal ruler with markings every centimeter, labeled from 1 to 10.

Exam answers

Figure 1 shows a 10x6 grid of circles. Rows 1-4 show a wave of black cells moving from left to right. Row 5 is a white bar with a right-pointing arrow. Rows 6-9 show the wave moving from right to left. Row 10 is a white bar with a right-pointing arrow.

5. The wavelike contraction of smooth muscle tissue that moves food down the esophagus is called

peristalsis

10. The graph below shows the homoglobin saturation curve. Provide the label for the x-axis in the box.

Hemoglobin
saturation (%)

x-axis label:

plasma oxygen partial pressure (mmHg)

KEY A
